
F.A.Q.

Q. What should go on my website?

A. You should place information that you would normally give over the phone or in person to new customers or members. A web site is an advertisement that is in full color and available to appear on a customers computer at their convenience for them to learn more about your product or service.

Q. How long will it take you to design my site?

A. Typically, 5-12 days. It all depends on how quickly information is provided to us and how large the project is.

Q. What about graphics and pictures? Do I need to pay for those?

A. Absolutely not, we provide all the graphics and stock photography.

Q. Will my site appear on the search engines?

A. We will submit your completed site to the largest of the free search engines and during the designing process we will try implementing the best possible keywords for these FREE search engines to be able to find you. The typical time is 6-8 weeks, but each search engine is different.
